

Journée thématique FSC - PCA

Fluides Supercritiques - Parfums, Cosmétiques,
Arômes

Cyrille SANTERRE

Engineer in analytical chemistry from the CNAM (Conservatoire national des arts et métiers) of Paris and graduating with a master's degree in cosmetology from Paris XI university of Chatenay- Malabry, France. He is now a teacher at ISIPCA Versailles in France and PhD student since 2017 (Title: Development of new analytical tools for supercritical extraction and chromatography: application to cosmetics). He works on application of SFC-HRMS since 2014 and SFE/SFF application since 2017 on natural products matrix (Extraction, Characterization and assay of interested compounds). His works are focused on small molecules (terpenes and terpenoids).
